This year, we invite conference delegates to think about how they engage with the wider healthcare system, exploring ways to better support our clients through positive interactions with other health professionals, through research and evidence-informed practice, and through self-reflection.
Conference Program

Friday
12 October
### Preconference workshops

#### 9.30AM – 4.30PM

- **Working with Posture: A Biopsychosocial Perspective** – Robert Libbey
- **Key concepts in getting to the nub of your client’s back pain** – Josephine Key
- **National Educators’ Forum**

#### 5.30PM

- **Members’ meet and greet** – Royal Exhibition Hotel, Surry Hills

Conference Program

Saturday
13 October

Speakers
IAN HARRIS
Keynote Address:
Surgery, the ultimate placebo

Ian Harris is Professor of Orthopaedic Surgery at UNSW Sydney with a clinical practice based at Liverpool Hospital and an academic practice based at the Ingham Institute for Applied Medical Research and the Institute for Musculoskeletal Health at Royal Prince Alfred Hospital and the University of Sydney. His clinical interests are in orthopaedic trauma and his research interests are centred on surgical effectiveness and include randomised trials, systematic reviews and methodological studies covering all aspects of surgery, particularly fracture surgery, joint replacement surgery and spine surgery. He has presented and published widely, including in the BMJ, the Lancet, JAMA and the New England Journal of Medicine and is author of the book Surgery, the Ultimate Placebo.
MARY O’KEEFFE
Plenary address:
The importance of the words we use: implications for the treatment of MSK conditions

Mary O’Keeffe is a physiotherapist and European Union Horizon 2020 Marie Skłodowska-Curie Global Fellow at Musculoskeletal Health Sydney, The University of Sydney. Mary was awarded her PhD in 2017 in the University of Limerick. Her PhD research examined whether tailoring multidimensional rehabilitation to the individual chronic low back pain patient enhances effectiveness. Mary is very passionate about public engagement and communicating evidence-based information about low back pain through radio, newspapers and social media. Examples include “All you ever need to know about back pain” (RTE News Ireland), “10 myths about back pain and how to cope when it strikes”, “15 things you didn’t know about back pain”, “How to move on from back pain” and “How your sleep patterns could be contributing to your back pain” (Irish Independent newspaper). Mary has published 33 papers relating to low back pain and other musculoskeletal pain conditions.

TIM CLARK
Plenary address:
The Pleasure-Purpose Principle (or how I learned to stop worrying and enjoy my massage)

Breakout workshop:
Knowing Thyself: The Role of Self-awareness in Massage Therapy

Tim Clark has a diverse background, including education and the arts, which informs his holistic work as a massage therapist and psychotherapist at Time & Space Therapies in Melbourne. He completed the Diploma of Remedial Massage last year, and the Masters in Counselling and Psychotherapy at the Cairnmillar Institute earlier in 2018. His Master’s thesis uses psychotherapeutic theory to examine the relationship between a massage therapist and her client.

For more information, please visit http://www.amt.org.au/conference/welcome.html
JENNY RICHARDSON
Plenary Address: Massage Research: Are we asking the right questions?

Jenny is the owner of Canberra Myotherapy and has over 12 years’ experience in treating clients with pain and injuries. She is passionate about understanding how the body works and using this to help clients with ongoing pain. Unfortunately (for her bank balance), she is a perpetual learner so, as well as 10 million continuing education courses, she is currently undertaking a research project in massage therapy as part of a Bachelor of Science (Honours) with Charles Sturt University.
ROBERT LIBBEY
Preconference workshop: Working with posture: a biopsychosocial perspective

Breakout workshop: Ligamentous Articular Strain Techniques for the Shoulder

Robert Libbey graduated from the Canadian College of Massage and Hydrotherapy in 1994. As a faculty member at West Coast College of Massage Therapy, Robert served as a Senior Clinical Supervisor and instructed in the Orthopedic and Neurological Examination departments.

Robert has been studying, practising and enhancing Ligamentous Articular Strain Techniques (LAST) for over 20 years. He incorporates evidence-informed research pertaining to fascia, joint mechanics, arthroneurology, the neurophysiological model of referred pain and the biopsychosocial model for patient management into these courses.

For more information, please visit http://www.amt.org.au/conference/welcome.html
JOSEPHINE KEY
Preconference workshop:
Key concepts in getting to the nub of your client’s back pain

Breakout workshop:
A unique look at the pelvis in health and its dis-ease

Josephine Key is a neuromusculoskeletal physiotherapist with over 45 years in clinical practice.

The evolution of her model of care is the result of evaluating and integrating the available movement, fascial and neuroscience; the ample evidence gleaned from clinical practice; and the exploration and evaluation of various movement disciplines. Josephine is increasingly exploring the felt sense of movement and the ability to exploit neuroplastic change – “retraining our brain” to organise healthier movement patterns and better biomechanics.

Josephine has had a number of academic papers published, has presented at international congresses and conducts workshops both nationally and internationally for physiotherapists, interdisciplinary manual therapists, and movement teachers. She is the author of BACK PAIN: A movement problem. A clinical approach incorporating relevant research and practice. She has recently completed “Freedom to move: movement therapy for spinal pain and injuries” which will be published in September 2018.
**MIRNA TARABAY**  
**Breakout workshop:**  
**Trauma informed care**

Mirna Tarabay is a psychotherapist and counsellor whose work experience with survivors of trauma spans over a decade. She has worked in a range of capacities primarily with survivors of domestic violence and sexual abuse. Mirna has a practice in Sydney where the focus of her clinical work is with adult survivors of child abuse. She is also an educator and provides training to student counsellors at one of the leading counsellor educator institutions in Sydney. She also conducts training programs in a range of subject areas for government and community-based organisations.

---

**DEREK ZORZIT**  
**Building for success**

Derek Zorzit has run a thriving rehabilitation and massage therapy business in Canberra since 1993. During this time, he has also worked with Olympic athletes and elite sports teams, including the Brumbies and the Wallabies. He was AMT Massage Therapist of the year in 2011 and is currently serving as Vice-Chairperson of AMT.
Workshops
WORKING WITH POSTURE: A BIOPSYCHOSOCIAL PERSPECTIVE
Presented by Robert Libbey

This interactive workshop will present evidence-informed research supporting Ligamentous Articular Strain Techniques, through a combination of demonstration and hands-on practical application and feedback.

If you are looking to challenge your perceptions on posture; change how you communicate with your patients; incorporate mechanoreceptor specific techniques in your work; and engage with the research pertaining to posture and how to incorporate that research into your practice, then this is the workshop for you.

Together we'll look at the biopsychosocial model and how it applies to posture. We will challenge the preconceived negative perceptions and communication pertaining to posture, start positively cultivating body awareness and improve functional positioning, and promote strength and adaptability.

Not only will you walk away thinking and communicating differently about posture but you will learn strategic manual techniques focused on changing habitual positions, targeting the nervous system with mechanoreceptor specific techniques for the ligamentous and tendinous structures.

For more information, please visit http://www.amt.org.au/conference/welcome.html
KEY CONCEPTS IN GETTING TO THE NUB OF YOUR CLIENT’S BACK PAIN
Presented by Josephine Key

This workshop will briefly review healthy spinal support and control mechanisms, and provide some new insights into postural control and aligning the thorax. It will also examine some of the myths around ‘core control’ and ‘deep breathing’. A clinical working model of posturo-movement dysfunction and a simple clinical subgroup classification system will be presented. This guides patient assessment and patient-tailored interventions – both manual and movement therapy - to address dysfunction which may underpin the client’s pain.

In the practical component, we will cover the common observable changes seen in postural assessment, and the specific testing and re-education of effective control of the deep spinal stabilisation system. We will also discuss complementary manual therapy approaches and workshop a series of suitable and appropriately staged home exercises which care for the spine and re-establish effective control of the deep axial support and stabilisation system.

Register online:
TRAUMA INFORMED CARE
Presented by Mirna Tarabay

This 3-hour introductory workshop will assist participants to recognise the impact of abuse, neglect and other interpersonal trauma on people accessing their service. It is an ideal introduction to mental health, recovery and trauma concepts for practitioners who do not work in the mental health field.

You will learn about a range of topics including: trauma; how trauma relates to the stress response; understanding flashbacks, triggers and dissociation; developing trauma-informed responses by exploring safety in relationships; and understanding vicarious trauma and vicarious resilience.

The workshop will increase your confidence in responding to people who have experienced interpersonal trauma and develop trauma-informed responses to increase safety within your work environment.

KNOWING THYSELF: THE IMPORTANCE OF SELF-AWARENESS FOR MASSAGE THERAPISTS
Presented by Tim Clark

We all like to think we’re pretty self-aware but even the most introspective of massage therapists can be tripped up by their unconscious material. This interactive session looks at how we can recognise our blind spots so they don’t come between us and our clients. It promises to be an enlightening and refreshingly honest exploration of who we really are and how self-awareness can make us better therapists.

For more information, please visit http://www.amt.org.au/conference/welcome.html
LIGAMENTOUS ARTICULAR STRAIN TECHNIQUES FOR THE SHOULDER
Presented by Robert Libbey

In this interactive workshop, we will cover specific assessment and innovative treatment techniques to effectively treat neurofascial force-coupling dysfunctions of the shoulder to improve treatment outcomes. It combines demonstration with hands-on practical application and feedback. You will learn ligament pain referral patterns for the shoulder supported by the Neurophysiological Model for referred pain.

By the end of the 3-hour workshop, you will be able to:

• specifically palpate the fascial/ligamentous structures of the shoulder demonstrated in class
• identify dysfunctional neurofascial force-coupling patterns by specific motion testing of the shoulder
• reproduce in-class demonstrations of assessment and treatment techniques for shoulder dysfunctions
• describe how referred pain occurs according to the Neurophysiological Model
• recognise the typical Ligamentous Pain Referral Patterns of the shoulder.

Register online:
A UNIQUE LOOK AT THE PELVIS IN HEALTH AND ITS DIS-EASE  
Presented by Josephine Key

The pelvis is a busy cross roads of function between the legs and the spinal column. It is one of the main agents of weight shift through the body and the initiator of much spinal posturo-movement yet its healthy function is generally little appreciated, let alone its dysfunction as a cause and perpetuator of spinal pain syndromes.

This workshop will briefly cover healthy pelvic function and introduce the pelvic fundamental patterns of control. We will proffer a working model of pelvic dysfunction commonly seen in low back pain and pelvic pain disorders. The practical aspect will cover the common observable changes in pelvic postural and movement assessment, and discuss appropriate manual therapy avenues to redress pelvic joint and myofascial dysfunction.

We will then look at complementary movement therapy and its incorporation into a few simple mindful related exercises that can be adopted as part of activities of daily living.

BUILDING FOR SUCCESS  
Presented by Derek Zorzit

This highly interactive and fun workshop will cover how to improve relationship with GPs and health care providers to increase business; how to deal effectively with Comcare and other insurance agencies; keeping client retention rates high; using your spare time well for marketing; and using AMT marketing resources and available research data successfully. It’s there for a reason! You will learn how to maintain and build a client base ethically and professionally, without creating dependence or relying on rebooking clients without a sound therapeutic rationale.

For more information, please visit http://www.amt.org.au/conference/welcome.html
AMT has negotiated a delegate rate at the Rydges Sydney Central from October 11 – 14. A superior King single is $229.00 per night and double occupancy is $249.00 per night. These rates include a full, buffet breakfast. Contact the reservations team on 02 9289 0000 or reservations_sydneycentral@evt.com and quote block #453006 when making your booking. Credit card details will be required to guarantee the reservation.

AMT is happy to compile a register of delegates interested in twin sharing rooms to save on costs. Please contact AMT Head Office on 02 9211 2441 to register your interest.

There is also a range of reasonably-priced accommodation in and around the conference venue, including backpackers. We recommend you look at Wotif.com and book early.

The venue is located within 5 minutes walk from Sydney’s Central station. The direct train line from the domestic airport takes around 10 minutes to reach Central.

Parking

There is underground parking available at Rydges Sydney Central for $44 per day/night.
